

First 1 write St and get the following data:

A screenshot of a web application showing a dropdown menu. The selected value is "ST-01-2009". The dropdown list is open, displaying a list of values: "ST-01-2009", "ST-02-2009", "ST-03-2009", "ST-04-2009", "ST-05-2009", "ST-06-2009", "ST-07-2009", "ST-08-2009", "ST-09-2009", and "ST-10-2009".

2. I select a value:

A screenshot of a web application showing a dropdown menu. The selected value is "ST-08-2009". Below the dropdown menu is a button.

3. I click the button to take the value in the TextBox

A screenshot of a web application showing a dropdown menu. The selected value is "ST-". Below the dropdown menu is a button.

Either I get a wrong value like this or
an Exception

The code:

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;
using System.Data.OracleClient;

public partial class local_V09_Ebene1_ErfListeVerkehr : System.Web.UI.Page
{
    protected System.Data.OracleClient.OracleConnection conn1;
    protected System.Data.OracleClient.OracleCommand cmd1;
    protected System.Data.OracleClient.OracleDataAdapter da;

    protected void Page_Load(object sender, EventArgs e)
    {
        this.SqlDataSource1.ConnectionString = string.Format("user
id={0};password={1};data source={2}", this.Session["LOGIN"].ToString(),
this.Session["PWD"].ToString(),
System.Configuration.ConfigurationManager.AppSettings["myDataSource"]);
    }

    protected void WebImageButton1_Click(object sender,
Infragistics.WebUI.WebDataInput.ButtonEventArgs e)
    {
        this.WebTextEdit1.Text = this.WebDropDown1.SelectedItem.Text;
    }

    protected void WebDropDown1_ItemsRequested(object sender,
Infragistics.Web.UI.ListControls.DropDownItemsRequestedEventArgs e)
    {
        this.SqlDataSource1.SelectCommand = string.Format("SELECT
IDX,PARAMETER FROM MASTER.K_PARAMETER WHERE PARAMETER LIKE '{0}%',
e.Value.ToString().ToUpper());
        this.WebDropDown1.DataBind();
    }
}
```

And here's the aspx-code:

```
<%@ Page Language="C#" AutoEventWireup="true"
CodeFile="ErfListeVerkehr.aspx.cs"
Inherits="local_V09_Ebene1_ErfListeVerkehr" %>
```

```
